Re: Health Care Notification Network Registration

Midwest Medical Insurance Company recognizes how important it is for physicians to have quick and reliable information about patient safety issues. A new free service is available that meets this need – the Health Care Notification Network (HCNN).

This online network provides important product-related patient safety alerts that are mandated by the FDA. Currently physicians are getting these alerts in the mail, which can be slow and unreliable. Sending the alerts through a secure online network has the following benefits to physicians:

1. Faster and more efficient delivery of patient safety alerts
2. Receiving only patient safety notices (i.e., no advertising or spam)
3. Ability to designate staff members to receive the alerts
4. Ability to opt out at any time

MMIC is encouraging physicians to use HCNN because we believe that a rapid and focused delivery of FDA-mandated product recalls and warnings has the potential to prevent patient injuries.

You can enroll in the HCNN on its website www.hcnn.net

For more information, please contact Peggy Wagner at 1-800-328-5532 or Peggy.Wagner@mmihc.com
