

Technology Solutions Update

3rd Quarter 2006

NextGen® EPM/EMR Resource Section Added to MMIC's Web Site

MMIC Technology Solutions' NextGen electronic medical record (EMR) and enterprise practice management (EPM) systems clients now can find the latest product information on the MMIC Group Web site.

We have added a resource section to the Technology Solutions' website section that includes EPM and EMR documentation, downloadable product guides, software updates and newsletters. Information is updated frequently.

To access the section you must be a registered member of the MMIC Group Web site. If you are not yet a member, register by clicking on the "Register for MMICGroup.com" link on the top left side of the

page. Make sure to select "Yes" from the drop down list for the question that asks, "Are you or your organization a Technology Solutions client?" After we have verified your registration, we will send you an e-mail letting you know that you can access the members-only resource section located on the right side of the Technology Solutions page.

If you are a member of the site, you can identify yourself as a Technology Solutions customer by logging in to MMICGroup.com and selecting the edit profile link. You also can contact MMIC Technology Solutions customer service center at (888) 928-8266, (763) 201-0494, or MMICSolutionsSupport@mmihc.com.

MMA Members Save on NextGen EMR and EPM Licenses

Minnesota Medical Association member can save 15 percent on individual physician licenses for the NextGen enterprise practice management and NextGen electronic medical record systems if purchased by December 31.

MMIC Technology Solutions is an authorized reseller of NextGen EPM and EMP. The EPM will help streamline a clinic's front and back office administration. The EMR system will help clinics create and maintain medical records. Both products work toward improving quality of care and office efficiencies. The EPM and EMR are appropriate for a solo practice, large group practice or a practice with multiple locations.

MMIC Technology Solutions and the Minnesota Medical Association have joined together to make this offer available to MMA physician members. For more information, contact Brian Salzman, MMIC Technology Solutions sales manager, at 800-328-5532, 763-201-0304 or brian.salzman@mmihc.com.

MMIC Technology Solutions Offers Network Support Services

Outdated computer systems can become a bottleneck restricting the success of an organization. MMIC Technology Solutions can help healthcare organizations keep computer systems current and operating effectively. We will review your computer network and your business requirements to determine where opportunities for improvement exist. Staff can then provide complete network planning, installation, maintenance and project support services.

Services can include on-site monitoring of servers and desktop computers, upgrades and installations of virus protection software and computer hardware and

implementation of large software systems. We will work with your IT staff or work independently to plan technology projects, answer questions and resolve any problems that your organization experiences during computer system implementations or upgrades.

Keeping your networks up-to-date helps alleviate computer problems that can disrupt your business, including computer virus outbreaks, data loss and security breaches.

For more information, please contact the MMIC Technology Solutions sales team at 1-800-328-5532.
